PERFORMANCE DATA

Lumen values are measured by third party certified laboratories performed in accordance with IESNA LM-79-08 as well as Lighting Facts listed.

Nominal Wattage	Measured Wattage	Lumen Output	CCT	Distribution Type	CRI	LPW
60W	57W	8000lm	5000K	Type V	>70	140
100W	97W	13200lm	5000K	Type V	>70	136

PHOTOMETRY

All published luminaire photometric testing performed to IESNA LM-79-08 standards by a NVLAP certified laboratory. IESNA LM-79-08 specifies the entire luminaire as the source resulting in a fixture efficiency of 100%. Results may vary per actual order.

NOTE:

1. Motion Sensor is for 120-277V only and recommended for a maximum mounting height of 20ft (6m). Default "stand-by" dimming level is 30% and none Cut Off. Besides, daylight sensor default setting is disable. The RC-100 Remote Control can operate all sensor functions. Please refer to more sensor setting details on the next page.
2. Black finish is standard. Additional charges will apply for all the other colors. Please contact customer service for premium adder.

PIR DIMMING SENSOR FUNCTION

The sensor is an innovative motion sensor, switch on the light on detection of movement, and switch off after a hold time when there is no motion detected.

1. No motion detected, all lamps switch off.

2. Any movement is detected from any direction, all lamps synchronously switch on.

3. No motion is detected in detection area, all lamps synchronously dim to a low light level after hold time.

4. After stand-by period, the lamps switch off if no movement is detected in the detection zone.

NOTE:

1. If you choose STAND-BY DIM is 0, the stand-by period is 0, it is ON/OFF function.

PIR DIMMING SENSOR SETTING DBI810-B-M10 (120-277V)

By selecting the combination on the DIP switch, sensor data can be precisely set for each specific application.

The sensor setting also can be done by a remote control (RC-100) which need to be bought separately.
